

DURECON WOOD & STEEL LIBRARY SHELVING

OPTIONS & ACCESSORIES

Whether the goal is to maximize functionality or add individuality and style, Palmieri Furniture Ltd. offers a wide variety of options and accessories to complete any Durecon Wood & Steel Library Shelving configuration.

OPTIONS

- Wood hinged, glass sliding, or wood framed glass doors protect learning materials and contribute a refined finishing touch
- Continuous tops can be used to add color and maximize display space
- Maximize display and storage space with finished backs in cork or slotwall

ACCESSORIES

- Create customized shelving configurations with top filler panels
- Meet unique storage needs by adding specialized shelving, racks or book-ends
- Mobile shelving facilitates the relocation of materials with a 16-gauge tubular steel frame and swivel castors
- Store oversized collections efficiently and safely with Picture Book and Big Book Storage

SHELVING – STEEL

- All metal shelving is 18-gauge, cold rolled steel, and finished in a powder epoxy, baked enamel for durability
- Flat metal shelves feature flanges on all four sides; front and rear flanges are turned up and in (forming a triple bend) for additional support
- Low back metal shelves feature flanges on three sides; front flange is turned up and in (forming a triple bend) for additional support. Back of shelf is bent up 90 degrees to form a 1" book stop
- Shelves can accommodate weight loads of 50lbs/ft² without deflection in excess of 3/16"
- Shelves are notched to accommodate 3/16" diameter x 1 1/4" long, threaded galvanized support pins
- Metal magazine shelves feature a 1" high x 1" deep lip along the front edge to secure magazines. Shelves are mounted using standard retractable magazine shelf hardware
- Shelves are supplied at a standard width of 35 1/4". Widths of 30" and 24" are also available at an additional charge
