PAIR ANY LAVORO WITH...

Ongo® is not your average stool, it is your 'sitting workout' stool. Its curved cushioned seat reacts to every shift in weight and thus activates the core muscles and blood circulation. A rotating ball moves in the bottom track at the foot of the stool and signals acoustically whenever the sitting angle changes. It promotes proper sitting posture behind an office desk or in the gym studio! This portable, lightweight stool is pneumatically height adjustable. Simply press the inner disk underneath the seat, while sitting and tilting on one side, as you would a lever. Get ready, sit, and get fit!
